

SimplyFowl - Issues

Connor Astemborski, Cassandra Bailey, Brian Mendoza, Zachary Miles, Riddhi Patel,

Madeline Presnell, Joseph Tagliaferro, Barret Vogtman

December 18, 2019 - Senior Project Fall 2019

Bugs:

Maintenance Page:

- If the user tries to add new customer/truck/driver with invalid inputs, an alert appears saying the customer/truck/driver was added, even though it was not.
- Drivers who have expired licenses can be added.

Order Page:

- When entering multiple orders at the same time, the same flock can be chosen more than once (only the first order for that flock gets created).
- If the user doesn't choose a customer and/or a flock when entering an order, an alert appears saying the order was added, even though it was not.

Dispatch Page:

- If the user clicks "Clear" before finishing a delivery route, the Truck Driver dropdown is enabled when it should not be.

Misc.:

- If an admin changes their role on the Accounts Management page, their permissions are not removed until they log out and log back in.

- If a user's username is changed before they log in for the first time, they will not be directed to the Change Password page.
- If a user who is a truck driver has their account deleted, they are not deleted from the Driver table and can still be selected on the Dispatch page.

Missing Features:

Login Page:

- There is currently no tracking of failed login attempts.

Order Page:

- There is currently no way to tell if orders are part of a scheduled delivery or not.

Shipments Page:

- Invoices are not currently printable in the proper format.

Maintenance Page:

- There is currently no way to edit an existing customer, truck, or truck driver's information.
- There is currently no way to remove existing truck drivers.

Farm Page:

- Farms do not currently have a state or zip code associated with them.

Truck Driver Page;

- There is currently no way to mark deliveries as completed.
